

Swim Classification Procedures

The swim classification of individuals participating in a Boy Scouts of America activity is a key element in both Safe Swim Defense and Safety Afloat. The swim classification test should be renewed annually, preferably at the beginning of each outdoor season. Traditionally, the swim classification test has only been conducted at a long-term summer camp. However, there is no restriction that this is the only place the test may be conducted. It may be more useful to conduct the swim classification prior to the unit attending summer camp.

All persons participating in BSA Aquatics are classified according to swimming ability. The classification test and test procedures have been developed and structured to demonstrate a skill level consistent with the circumstances in which the individual will need in the water. The Swimmer's Test demonstrates that the minimum level of swimming ability for recreational and instructional activity.
